GASTROENTEROLOGY

COMPREHENSIVE DIGESTIVE HEALTH CARE CLOSE TO HOME

McLaren Lapeer Region provides comprehensive gastroenterology care for patients with conditions affecting the digestive system, including the esophagus, stomach, small and large intestines, liver, gallbladder and pancreas.

Our gastroenterology team provides evaluation, diagnosis and treatment for a broad range of gastrointestinal conditions, with access to the resources and coordinated care of McLaren Health Care.

CONDITIONS TREATED

McLaren Lapeer Region Gastroenterology evaluates and manages a range of digestive health conditions, including:

- Acid reflux and GERD
- Barrett's esophagus
- Abdominal pain and bloating
- Chronic diarrhea
- Constipation
- Irritable bowel syndrome (IBS)
- Inflammatory bowel disease, including Crohn's disease and ulcerative colitis
- Celiac disease and other intestinal disorders
- Difficulty swallowing (dysphagia)
- Nausea and vomiting
- Peptic ulcers and H. pylori infection
- Gastrointestinal bleeding
- Diverticular disease
- Colon polyps
- Liver disease
- Pancreatic and biliary disorders
- Rectal bleeding
- Abnormal liver tests

SERVICES AND PROCEDURES

Depending on the patient's condition and clinical needs, gastroenterology services may include:

- Colonoscopy
- Upper endoscopy (EGD)
- Diagnostic evaluation of gastrointestinal symptoms
- Colon cancer screening and surveillance
- Evaluation and management of gastrointestinal bleeding
- Esophageal and swallowing disorder evaluation
- Evaluation and management of liver and pancreatic disorders
- Biopsy and tissue sampling during endoscopic procedures
- Polyp detection and removal during colonoscopy
